

Sara Baqi Success Story

From Mi ComputSolution College to Health and

Social Care Management:

My name is Sara Baqi Mohammed Khan, and I am currently studying Health and Social Care Management at university. However, my academic journey began at Mi ComputSolutions, where I achieved my goals in both maths and English at Entry 3 and Level 1&2, respectively. Overcoming language barriers as English is my third language. Initially shy to speak, when I completed I progresses onto in ICT and Teaching Assistant courses as I was very happy with the services and staff at MI.

Pursuing my academic goals was not without its challenges. I faced many obstacles along the way, including the difficulty of learning new subjects and the pressure of meeting deadlines. However, I persevered and worked hard to overcome these challenges.

Despite the challenges I faced, I made significant progress in my academic journey. Reflecting on those years fills me with gratitude for the enriching experience and the wellbeing I received. I owe my success to MI's unwavering support. Now, with newfound confidence, I've progressed into university studying Health and Social Care Management, and im fueled by even bigger plans and goals for the future.

I received a great deal of support from the staff and teachers at Mi ComputSolutions: Laurent, Blessing, Muhammad, Slimane, and Mofeayo all took good care of me and my well-being. Their support helped me achieve my goals and overcome the challenges I faced.

Conclusion: My academic journey has taught me many valuable lessons. I learned that with dedication and perseverance, anyone can achieve their goals. I also learned the importance of seeking help and support when needed. To others who are pursuing their academic goals, I would advise them to stay focused, work hard, and never give up on their dreams.
